JOY AUDIO SYSTEMS
Revox Home Solutions
Revox Joy –
the greatest audio product for any space.

We’ve been producing audio products of extraordinary quality under the Revox brand for nearly 70 years. The appeal of these unique products lies in their top sound quality, easy, intuitive operation and timelessly elegant design.

The Joy series offers music lovers a rich range of options. Follow your favourite TV shows and enjoy CDs in top sound quality using Joy speakers.

You can select and play music with premium sound from internet radio, from your private collection stored on a server or using Tidal, a streaming service.

Select your favourite music on your smartphone and the Joy Receiver takes care of the rest. It turns on automatically through Bluetooth and you can enjoy your music pumping through a predefined set of speakers.

Simply wonderful.
Revox Joy Network Receiver
Wonderfully simple.

The Revox Joy Network Receiver is a multifaceted talent in terms of selectable sources and functions, in terms of options for operation, and naturally, with respect to audio quality as well.

A timeless design, premium materials like real glass and aluminium, and excellent sound, all brought together into a compact system, makes this the ultimate network receiver for audiophiles who aren’t interested in compromising. It’s a brilliant performance, powerful enough to meet the most demanding expectations. At the same time, you’ll be able to enjoy the quiet notes with equal pleasure.
The best of all soundscapes – experience the enormous variety of entertainment.

Would you like to watch TV and not just enjoy excellent picture quality but extraordinary sound as well? And would you like to do this without having to use more than one remote control? In that case, Revox Joy is the right choice for you.

It’s easy to link the audio output from your TV to the input on the Revox Joy Network Receiver. In a jiffy, you’ll experience TV sound in an entirely new dimension. You can also programme the S208 Joy remote control to handle both the network receiver and the TV for optimal ease of operation.

You can also select your music from numerous other sources. Whether internet radio, an audio server, an audio streaming service like Tidal or a USB stick, the Joy Network Receiver offers you access to many classic sources via different analogue and digital audio inputs. It features a DAB+/FM radio or a Bluetooth interface which will automatically turn on when coupled to the Joy product.

Together, the Revox Joy Network Receiver and the G Speaker series form the ideal whole in terms of both sound and look. You can set the sound exactly as you wish for the speaker and the space using the digital signal processor in the Joy product. With matching materials and colours, the system looks like it was designed as one product.

You can get Joy products from Revox in sleek white, noble black or a fashionable combination of silver and black.

The Joy Network Receiver comes in three different versions. You can choose the dimensions and output performance. The main functions are listed in the table below. You’ll find additional details on the Revox website: www.revox.com

*starting with the MKII version
Music enjoyment for the strictest expectations –
Revox Joy CD Player.

Insert and enjoy – the CD has been the epitome of high quality and, in particular, convenient music enjoyment for more than three decades. Use the new Joy CD Player for the greatest ease. We’ve added a compact, stylish and technically sophisticated element to the Joy family especially for this medium. The CD player is connected to the CD link of the Joy Receiver with a single cable, after which you can operate it using the remote control or the Joy app for ultimate convenience.

Your personal music archive –
Revox Joy Audio Server.

Few things are as everlasting and as timeless as music. It doesn’t matter if you speak of Mozart, Elvis or the Beatles, their sound is above the question of what’s fashionable. This constancy is reflected in the design and materials of the Revox Joy Audio Server. Premium glass combined with real aluminium highlights its elegance.

The path to the perfect audio library has never been as easy to take as it is with the Revox Joy Audio Server. Everything you need to do is stored on one CD. The server starts as soon as it’s turned on and ejects the CD on its own after about ten minutes.

You can follow the process and set up your playlists on any monitor with an HDMI input. The song title information is also stored automatically. You can copy any music archives you already have onto the hard drive or incorporate them into the database. You’ll then be able to search your entire music archive using the Joy app or the S208 remote control and activate playback on the Joy Network Receiver.

The server features enough space for up to 1,500 albums in CD quality or 2,300 albums in FLAC compression. Owners who have even larger collections can seamlessly expand the storage space using the network or an external product. This makes the Joy Audio Server the perfect feeder for the Joy series and the Revox Multuser System.
Everything in your hand.  
**Revox Joy Remote Control**  
The universal control.

**It must be a piece of cake to operate!**
This was the premise behind the S208 system remote control for the Revox product range. The elegant remote control with subtly lit buttons and a colour display controls the Joy family in a truly simple and intuitive manner, as it does other audio devices and your television. Multiple operating steps can be bundled together into a single press of a button using programmed macros (commands). The smart S208 from Revox puts you in control of your entire entertainment system with a single remote.

**Operate and browse using your smartphone or tablet – Revox Joy Apps.**

You have more options than the remote control for operating your Joy series. You can also use the Revox App S232 for the iPhone, iPod touch and iPad or the S235 for Android devices. The apps give you direct access to the music of your choice. Quick, easy to use and easy to follow – even with the “covers” of your favourite albums and the logos of your preferred internet radio stations and audio streaming service.

Naturally, you can also select and operate all other system sources with the apps, such as classic audio inputs, the Bluetooth audio input and the Joy CD Player. All of your content is shown in easy to read lists. Select your entry from the list and enjoy your music to the full. The Home button takes you back to the start quickly and reliably from wherever you are, where you select different services and sources.

The Play view shows you a large tile, as well as the most important functions, such as volume settings and skipping between songs. The Revox apps are embedded in the operating systems of Apple and Google, so many of the functions look just like the standards used by these providers.

Both apps can be downloaded free of charge from either the Apple Store or the Google Play Store.
Revox Joy – Technical specifications

Revox Joy S118 / S119 MKII / S120 MKII

Dimensions
- H 87 x W 200 x D 212 mm (S118) with WLAN antenna (a further 30–40 mm have to be calculated in for cable and plugs)
- H 87 x W 200 x D 352 mm (S119 / S120) with WLAN antenna (a further 40–50 mm have to be calculated in for cable and plugs)

Weight
- 2,0 kg / 4,9 kg / 6,3 kg

Power consumption
- max. 80 W / max. 150 W / max. 330 W
- Normal operation: 5,5 W / 14 W / 20 W
- Standby: < 0,6 W

Temperature range
- +10 ... 40 °C

Output power
- 2 x 25 W / 2 x 60 W / 2 x 120 W RMS

Sampling factor
- 20 bit at 1 kHz and 8 Ohm / 100 bit at 1 kHz and 8 Ohm

Harmonic distortion
- 0,05 % at 1 W and 4 Ohm / < 0,005 % at 25 W and 4 Ohm

Analogue inputs
- 2 / 2 / 2 analog; 1 / 2 / 2 optical; 16, 20, 24-bit PCM, SPDIF to 192 kHz (optical) / up to 96 kHz (optical)

Subwoofer out
- 0 / 1 / 1

Pre out
- 0 / 1 / 1

Digital out
- 0 / 1 / 1

Bluetooth
- 0 / 1 / 1, BT codec: aptX, AAC, SBC

CD Link
- 0 / 1 / 1

Audio formats
- AAC, ALAC, FLAC, MP3 (br + arib), OGG-Vorbis, WMA, WMV

Playlist formats
- M3U, PLS

Supported Media servers
- UPnP AV 1.1 & DLNA-compatible servers

Gapless Audio
- MP3 and AAC (require gapless tags)

Revox Joy S208 CD Player

Dimensions
- H 87 mm x W 200 mm x D 322 mm (a further 50–60 mm have to be calculated in for cable and plugs)

Weight
- 3,05 kg

Power consumption
- 0,4 W (Standby) / 7,5 W ± 1,5 W (Operation)

Temperature range
- +10 ... 40 °C

Supported format
- CD-DA in accordance with RED-Book Standard

Control
- IR, RS5 Commands
- RS232 Control

Main voltage
- 100 – 240 VAC / 50 – 60 Hz

Analogue output
- RCA socket 1/4”, asymmetrical

Frequency range
- 9 Hz – 20 kHz

THD + Noise
- < 0,019 %

Dynamic range
- 118 dB

S/N ratio
- 105 dB

Channel separation
- > 97 dB at 1 kHz

Digital output
- coaxial (1x) / optical (1x)

Frequency range
- 5 Hz – 20 kHz

THD + Noise
- < 0,018 %

Data format
- 44,1 kHz / 16 bit

Revox Joy S208 Remote Control

Remote control for Revox Joy products, with colour display. IR commands can be programmed through a database, using the Easy Creator software.

Width
- 52 mm

Length
- 240 mm

Weight
- 190 g incl. integrated rechargeable battery

IR range
- 8 m

WP range
- up to 65 m in open area

Frequency
- 2,4 GHz

Display
- 240 x 320 Pixel

Operation time
- approx. 1 week at normal operation

Revox Joy S208 Docking Station

Docking station for Revox Joy S208 remote control.

Width
- 80 mm

Depth
- 125 mm

Weight
- 25 mm

Weight
- 200 g
